

iCODE iVIEW & i360

Bringing Excellence in Computer
Science Education To Your Campus.

Fueling a passion for Technology & Innovation

We partner with school districts, private schools, and clubs to provide a comprehensive after school computer science program, starting as early as kindergarten. Knowledgeable instructors help students to become comfortable with technology in an approach that enhances learning in math, science, engineering, and the arts; preparing students with the skills to thrive in today's tech driven world.

- Convenient
- Flexible
- Access to computer science expertise

iView Program

(1) 1-hr Session Per Week

Each class involves a hands-on activity, designed to teach a new skill.

While skills build upon each other, the program is structured to allow students to join at any time during the school year.

Key focus areas

- Robotics
- Algorithms
- Game Design
- Python
- Engineering
- Digital Arts
- Physics

i360 Program

(2) 1-hr Sessions Per Week OR (1) 2-hr Session Per Week

Students progress through the iCode Belt System as though they were at our campus.

Students learn complex skills in coding and design, as well as analysis, logical thought, project management, and teamwork.

Key focus areas

- Programming Skills
- Robotics
- HTML
- CSS
- Web Design
- Game Design
- Python
- Java

Program Details

- 1-2 hour(s) per week
- iCode instructors will teach classes
- Proprietary STEAM curriculum
- Hands-on learning
